## VAGINAL HEALTH ENHANCERS

Vaginal rejuvenation is not just about looks; it also better the functionality of the vagina. Treatments like Votiva Feminine Revitalization address internal and external concerns to alleviate feminine health problems that occur due to aging, hormonal changes or physical damage. Obstetrician and gynecologist Henry Ramirez, MD of Ardmore, OK says, "Votiva restores and strengthens the area to improve intimacy, incontinence and well-being. It increases collagen formation, improves sensation and tightens tissues." Patients see results immediately and continued benefits over time. One patient, Susan, who had the procedure, says, "After having Votiva, I don't have problems controlling my bladder. I don't have to wear pads now or feel like I need to take three showers a day."
